

Maritime Group Corp

- Scope of Services -

Repair Services

Description: Repair and Maintenance Services

One of the major keys to achieving a long service life for your new or existing roof system is the completion of maintenance and roof repairs. This applies to all types of roof construction and all kinds of roofing materials. Even the "Cadillac" of roof systems, designed and installed by the roofing industry's best professionals, will experience problems earlier in its life cycle if the identification of deficient items and their timely repairs are not completed.

Maritime Group Corp. has the experienced staff and equipment to service all your repair and maintenance requirements, from a single roof to a large portfolio of properties. These items can include routine items such as cleaning clogged drains and inspecting for storm damage, to completing a detailed inventory of all your roof systems and their condition and providing cost-effective recommendations for repair and/or replacement. Maritime Group Corp. experienced roofing crews are able to complete any level of required repair, maintenance or construction with using appropriate and compatible materials. This includes 24- hour, on-call emergency response roof repair service (further details available on request). Our in-house metal fabrication, capabilities and available specialty contractors allow flexibility and timely service for roof-related carpentry, electrical, plumbing, and HVAC services.

Please contact our office to discuss your roofing repair requirements, or to formulate and implement a comprehensive maintenance plan for your facility or properties.
